A different photo book!

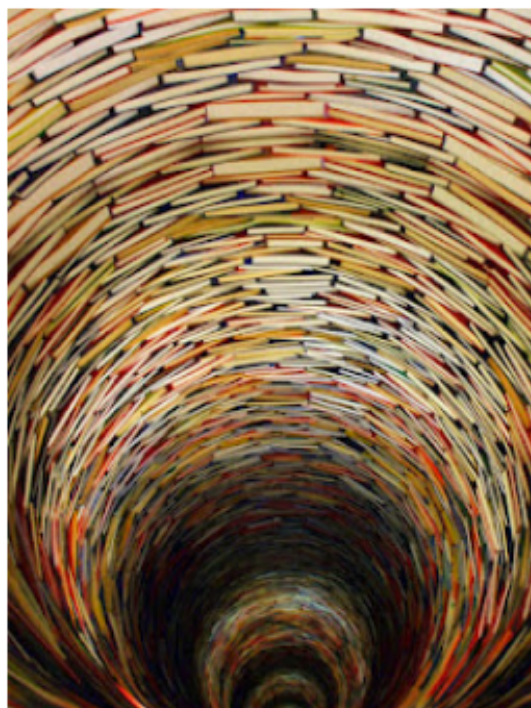

A fun tip: with the help of a QR code, you can virtually add anything you want in your book at [Solentro](#)!

The QR code allows usage for Smartphones to make the viewing more interactive.

Example: you have made a wedding book and want to share a video from the wedding. You have uploaded the video to, for example, YouTube. The QR code is linked to your video, and with the help of the viewer's smartphone, they can with a simple push of a button watch the video directly on their phones!

1. Create a QR code (for example, here: <http://goqr.me/>)
2. Download it as an image
3. Then add it to the book at Solentro

A bit odd, but really fun! We wish you lots of fun with adding your own videos to a [Solentro photo book](#)!

Exceptional satisfaction!

Easy to use, brilliant finished quality

I found this website unbelievably easy to use.

There are a number of different layouts for photos and text so that your finished book doesn't look like a bog standard product. It looks interesting and really bespoke.

My sister, who I was creating the book for, loved it. And everyone's messages and photos that I had inserted were extremely happy to see the finished product as Solentro allow you to publish a link for others to view, therefore everyone involved where able to see what the book would look like.

Amazing job Solentro! And thank you

Some of our most recent improvements:

- 500 pages!**
- Personalized cover!**
- Text on the book's spine!**
- Create your own template!**
- Large landscape photo book!**
- Choose your own background!**

Cinematic greetings!
